

MODEL 3200 PLATFORM AUTOMATIC

Automation is the Clear Choice for Safety and Cost Benefits

The numbers below represent the total annual estimated amount of times an operator will get on or off the forklift in a year dependent upon the number of loads. At a miniscule 25 loads a day, the operator will get on or off the forklift between 13 000 and 26 000 times a year. At least 13 000 times, the operator will be required to stoop for an extended period of time to attach the film to the pallet or cut the film.

Loads/Day		(# Times Off	+	# Times On)	5days x 52weeks	Annual Total
25	X	(1 or 2	+	1 or 2)	X 260	= 13,000 - 26,000
50	X	(1 or 2	+	1 or 2)	X 260	= 26,000 - 52,000
75	X	(1 or 2	+	1 or 2)	X 260	= 39,000 - 78,000

Eliminating the need for the operator to get on and off the forklift provides an estimated labor savings of between \$4,000 to \$13,000 per year. This labor savings can pay for the cost difference between a semi-automatic machine and the fully automatic 3200.

The 3200 can be operated from the forklift using the standard wireless remote

The HP-3200 is **ALL ELECTRIC**
No air requirement or noisy air compressors

The LP-3200 can be used with forklifts and pallet jacks (requires air)

Built in North America with Brand Name Components
The 3200 has Features & Benefits that Surpass the Competition

- ❖ Affordable and simple with more standard features than any other pallet wrapper in this price range.
- ❖ A quality machine built with quality components and supported by a local qualified distributor.

We invite you to go online at www.cousinsspackaging.com for more information or call your local distributor.
