

# MODEL 3200 PLATFORM AUTOMATIC

## Automation is the Clear Choice for Safety and Cost Benefits

The numbers below represent the total annual estimated amount of times an operator will get on or off the forklift in a year dependent upon the number of loads. At a miniscule 25 loads a day, the operator will get on or off the forklift between 13 000 and 26 000 times a year. At least 13 000 times, the operator will be required to stoop for an extended period of time to attach the film to the pallet or cut the film.

| Loads/Day |   | (# Times Off | + | # Times On) | 5days x 52weeks | Annual Total      |
|-----------|---|--------------|---|-------------|-----------------|-------------------|
| 25        | X | (1 or 2      | + | 1 or 2)     | X 260           | = 13,000 - 26,000 |
| 50        | X | (1 or 2      | + | 1 or 2)     | X 260           | = 26,000 - 52,000 |
| 75        | X | (1 or 2      | + | 1 or 2)     | X 260           | = 39,000 - 78,000 |

Eliminating the need for the operator to get on and off the forklift provides an estimated labor savings of between \$4,000 to \$13,000 per year. This labor savings can pay for the cost difference between a semi-automatic machine and the fully automatic 3200.

The 3200 can be operated from the forklift using the standard wireless remote

The HP-3200 is **ALL ELECTRIC**  
No air requirement or noisy air compressors

The LP-3200 can be used with forklifts and pallet jacks (requires air)

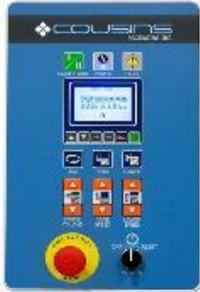

**Built in North America with Brand Name Components**  
**The 3200 has Features & Benefits that Surpass the Competition**

- ❖ Affordable and simple with more standard features than any other pallet wrapper in this price range.
- ❖ A quality machine built with quality components and supported by a local qualified distributor.

We invite you to go online at [www.cousinpackaging.com](http://www.cousinpackaging.com) for more information or call your local distributor.

COUSINS PACKAGING CONTINUES TO BE THE INDUSTRY LEADER IN ADVANCED DESIGNS

**SUPER INTELLIGENT CONTROLS:**

- ❖ A – B – C wrap program selector with capability to input and store unique wrapping parameters for each program.
- ❖ Each program can have its own individual settings:
  - different top and bottom wrap counts
  - different settings for a variety of load types

**CHAIN AND SPROCKET DRIVE (no belts or pulleys):**

*Turntables driven by chain and sprocket:*

- ❖ are more forgiving over a longer period of time compared to belt/pulley drives
- ❖ cannot be cut by sharp objects
- ❖ are more adaptable to severe environment conditions
- ❖ are easier to maintain and kept aligned properly
- ❖ chain and sprockets are readily available locally at a fair price

*HP (high profile) Chain Driven Turntable Features:*

- ❖ ANSI # 50 direct chain drive c/w chain tensioner
- ❖ 4 point caster support system
- ❖ No steel on steel contact

*LP (low profile) Chain Driven Turntable Features:*

- ❖ ANSI # 50 direct chain drive c/w chain tensioner
- ❖ maintenance free - 42 roller bearing support system
- ❖ no steel on steel contact

HP-3200

LP-3200

**LOAD CAPACITY:**

- ❖ Maximum load weight: 4,500# dynamic – 10,000# static
- ❖ Maximum load size: HP = 50" W x 50" L (71" max. load diagonal) x 80" H (plus up to 4" top overlap)  
LP = 48" W x 48" L (68" max. load diagonal) x 80" H (plus up to 4" top overlap)
- ❖ Minimum load size: Both LP and HP = 30" W x 30" L x 24" H

**CREATIVE ENGINEERING:**

- ❖ All motors, gearboxes and cables are totally enclosed and protected
- ❖ All AC motors
- ❖ Cousins Packaging uses the best available quality components
- ❖ We focus on using non-proprietary parts where feasible so they are readily available locally

**DEPENDABLE MACHINES:**

Backed by a strong 3/5 year warranty that includes **LIFETIME** on the blue powered prestretch rollers
