Customized Stretch Wrappers with Advanced Technology since 1994

3300-CTA
Conveyorized Automatic

**FILM TAIL TREATMENT - ALL ELECTRIC:**
❖ Electric actuated film clamp mechanism
❖ Electro-mechanically actuated film tail cut/wiper arm mechanism
❖ Ni-chrome impulse hot wire film cut off c/w automatic periodic cleaning cycle

**FILM CARRIAGE** - Less film slippage means more consistent stretch and the “sticky” side of the film will always be against both the rubber rollers and the load where it belongs.

**ALL ELECTRIC** - no pneumatic lines or noisy air compressors required

**SYSTEM CONFIGURATION** – Designed to be installed with existing product flow and conveyor layout design. Whether In-line or off-line, the automation package is designed to be in-line with conveyors using interface relays/logic or off-line standalone system using a wireless remote.
