

FOR PRODUCT THAT REQUIRES AIR FLOW

CHOOSE BETWEEN NORMAL FULL WEB WRAPPING OR BE ABLE TO EASILY CHANGE TO WRAP PRODUCT LEAVING OPEN AREAS FOR AIR FLOW

MODEL LP-2100-SRT or LP-SW WITH FILM SPLITTER AND MANUAL ROPER OPTIONS

- Wrap using the full width of either 20" or 30" film
- Split the film with a simple push of a lever into:
 - 20" film into (2) 10" bands
 - 30" film into (3) 10" bands
- Adjust each band to the desired width

The LP-2100-SRT and LP-SW Models Both Include:

- ❖ Heavy duty rugged surround deck to protect the turntable
- ❖ Super Rapid Thread II powered pre-stretch film carriage with unique film savings threading method
- ❖ Innovative controls with 3 separate wrap programs - each program can have individual settings for:
 - different top and bottom wrap counts
 - different force-to-load settings
 - different spiral speed settings
 - different settings for a variety of load types
- ❖ Includes LCD operator interface with helpful diagnostic capability
- ❖ All AC motors
- ❖ Maintenance free roller bearing turntable support design – no steel on steel contact
- ❖ Forklift lifting tubes front and rear for easy portability
- ❖ All motors, gearboxes and cables are fully enclosed and guarded for added protection and safety
