PALLET LOCK ROPING DEVICE

Watch a video: [Pallet Lock & Auto Film Cut](#)

The most effective method of securing the load to the pallet or skid. Easily programmed using the standard microprocessor and touchscreen to apply either the roped or normal full web film.

BENEFITS:

- Lock, secure and contain product to the pallet especially unusual shapes
- Prevent the film from tearing on sharp pallet corners
- Increase load containment where necessary without breaking the film
- Create air flow and ventilation for your product
- AIR REQUIRED – Equipped with or without a quiet, self-contained, and guarded air compressor.

APPLICATIONS:

- Mixed product with unusual shapes
- 55 gallon drums and bulk pails
- Agricultural products that need to breath
- Heavy product
- Product with sharp corners
- When film tears on sharp pallet corners
- Product such as tile, brick & block that need added load containment for each layer
- All standard pallet loads when locking the product to the pallet is desired

SELECT FROM THESE STANDARD ROPING PROGRAMS:

- Rope Base off/on Base Roping Revolutions (0-9)
