

## SPLIT BASE OPTION FOR OVERSIZED LOADS AND/OR SCALE MOUNTING

The Split Base Option is recommended:

- When the customer has an existing 4' x 4' platform scale that functions properly and wants to continue using it. The separate turntable can be mounted on top of the existing or a new scale provided by others.
- For larger load sizes, the split base is an alternative to needing a long base extension.

*Customized stretch wrappers with advanced technology since 1994*

MODEL HP2100-SRT

TURNTABLE CAN BE MOUNTED ON TOP OF AN EXISTING OR NEW SCALE PROVIDED BY OTHERS

### SUPER INTELLIGENT CONTROLS:

- ❖ A – B – C wrap program selector with capability to input and store unique wrapping parameters for each program.
- ❖ Each program can have its own individual settings for:
  - different top and bottom wrap counts
  - different spiral speed settings
  - different settings for a variety of load types

LAG TO FLOOR

### RUGGED TURNTABLE DESIGN:

- ❖ Heavy duty rugged steel plate for added protection from forklift abuse and damage *PLUS* forklift lifting tubes front and rear for easy portability.
- ❖ ANSI # 50 direct chain drive
- ❖ 4 point caster support system
- ❖ No steel on steel contact

### NOTES:

- The Split Base Option is only available on our high profile turntable models HP-2100-SRT, HP-SW, HP-1100-S. Not available for LP (low profile) models.

G	OHPSB – Split Base Frame - to accommodate scale or larger loads	List Price
