

WINDOW/DOOR WRAPPER

A stretch wrapper that can be designed for any size window or door - individual or bulk

The foundation of the system is our *SWITCH* model with industry leading features and benefits. Click here for more information on [THE SWITCH](#)

The top fixture mounted on the platen/hold down device is designed to secure the top of the product no matter the shape or size during the wrap cycle.

The platen/hold down device is activated by a convenient footswitch

The turntable has a fixed bottom bracket to secure OR an individual piece

An optional conveyor to assist in loading a very large item

No matter the shape or size of the product, the machine is designed to capture the top and bottom to secure it during the wrap cycle.
